

Kansas Sampler Festival 2010 **POLE ART SPECS**

Communities bringing pole art will be invited to participate in the opening ***Parade of Kansas Communities*** before erecting their poles at a pre-designated location. Please paint, embroider, vinyl letter, etc. your community name on the banner!

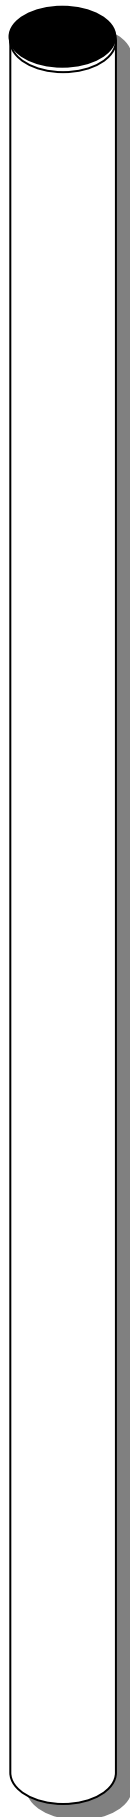

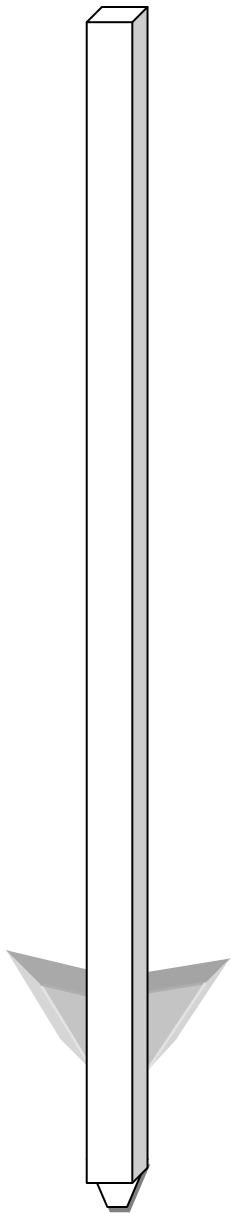

Flags made from a variety of materials can be used.

Lightweight canvas in colorful hues will work best. Let your imagination go and think ***"festive!"***

2" diameter PVC pipe / 8 – 10 ft. in length

The pvc pipe can be painted with a candy cane like stripe in colorful paint or any kind of design such as polka dots, stripes, shapes or could be covered with decorative cloth, materials, and so on. The pipe is then slipped over a fence post that has already been driven into the ground at designated locations at the festival. After the parade you will find an available fence post and slip your pole over the top of it where it will be left for the duration of the festival.

Steel Fence Post

(provided by festival host)

A sewn pocket on the side or top seem to be the most popular way of attaching the flag to the pole. Please see photos on the link provided at
